## What are the risks and what could I get in return?

### Risk Indicator

losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

**Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.**

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose value because of movements in the markets or because we are not able to pay you.

This product does not include any protection from future market performance, so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment. For a full disclosure of risks entailed by investing in the Product, please refer to the "Risk Factors" section of its Offering Memorandum.

We have classified this product as risk class 4 out of 7, which is a medium risk class. This rates the potential

## Performance Scenarios

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of a suitable benchmark over the last 10 years. Markets could develop very differently in the future. What you get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

Recommended holding period: 3 years		Example Investment: USD 10,000	
Scenarios		If you exit after	
		1 year	3 years
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress scenario	What you might get back after costs (\$)	3,935	3,984
	Average return each year	-60.65%	-26.42%
Unfavourable scenario	What you might get back after costs (\$)	7,958	10,012
	Average return each year	-20.42%	0.04%
Moderate scenario	What you might get back after costs (\$)	10,823	11,312
	Average return each year	8.23%	4.19%
Favourable scenario	What you might get back after costs (\$)	12,730	14,080
	Average return each year	27.30%	12.08%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you might get back in extreme market circumstances. This type of scenario occurred between 2016 and 2025. An appropriate proxy was used to calculate the performance of the product.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how affect your investment.

### Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, and how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed:

- In the first year you will get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario;
- USD 10,000 is invested.

Scenarios	If you exit after 1 year	If you exit after 3 years
<b>Total Costs</b>	73	254
<b>Annual Cost Impact*</b>	0.7%	0.8%

\* This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 5.1% before costs and 4.3% after costs.
